**CLINICAL SPECIALIST BRINGS NURSING EXPERIENCE TO MD
SCIENTIFIC**

Carol Martin RN, BSN, CCRN To Maximize Installation Benefits for Customers

CHARLOTTE, N.C. – MD Scientific is pleased to announce the addition of Carol Martin to their team. In her role as a Clinical Specialist, she will be responsible for the development and implementation of the clinical installation strategy for EndoTool™, developed and commercialized by MD Scientific, is a highly sophisticated software system that calculates the dose of IV insulin needed to quickly control blood glucose levels in a critical care setting. Carol will be the primary clinical liaison for customers of the refined software. She will work with hospitals that use the tool to decrease the workload associated with implementation of tight glycemic control.

Carol comes to MD Scientific with over 20 years of nursing experience. Her career includes 16 years in direct patient care in the specialty area of cardiovascular surgery. She has also acted in the role of nursing supervisor for a busy tertiary care medical center which was followed by serving as the Nurse Manager of The Cardiovascular Intensive Care Unit at Carolinas Medical Center. In this role Carol was responsible for department operations, care delivery patient outcomes, employee and patient/family education, as well as fiscal management of a multi-million dollar budget.

“The addition of Carol to the MD Scientific clinical team gives us significant nursing-oriented experience” said Shade Mecum, President and CEO of MD Scientific. “Carol’s unique perspective will allow us to individually tailor each EndoTool™ installation to maximize the benefits to our customers and their patients. Her knowledge, experience, leadership, and enthusiasm will be a significant contributing factor to our continued success.”

Carol’s interpersonal skills and creativity also propelled her to be selected to serve on many high profile hospital committees addressing employee retention, equipment selection, and day-to-day operations. In addition to these professional activities, Carol is currently working on her Masters of Science in Nursing at Queens University of Charlotte as well as staying busy as the mother of four active children.

About MD Scientific

Founded in September 2003, MD Scientific currently markets EndoTool™, a highly sophisticated software system that calculates the dose of IV insulin needed to quickly control blood glucose levels in a critical care setting. This proprietary, easy to use, FDA-cleared software actively models and adapts to individual patient responses to IV insulin – even those with fluctuating insulin requirements. For more information about the company, EndoTool™ and other offerings, please visit www.mdscientific.com.
